Profile

Motivated Computer Engineering student at INSAT with a strong foundation in full-stack development, data science, and applied AI. Passionate about building intelligent, user-centered applications that solve real-world problems. Experienced with LLMs, RAG architectures, and modern web technologies through academic projects and internships. Active contributor to tech communities with leadership experience in student organizations.

Education

Bachelor of Computer Engineering 2023 – Present (Expected 2028)
INSAT University – Institut National des Sciences Appliquées et de Technologie Tunis, Tunisia

High School Diploma (Baccalauréat) Graduated 2023
Lycée Pilote Bourguiba Tunis, Tunisia

- Average: 18/20

Experience

AI & Web Development Intern Summer 2025
Deevium Remote / Tunisia

- Developed an AI-powered module for the creation, classification, and evaluation of study notes, integrated into a MERN stack web application.
- Applied machine learning and NLP models using Hugging Face Transformers for intelligent content processing.
- Explored and implemented Large Language Models (LLMs) to deliver personalized learning recommendations.

Congress Project – "Prévention des Risques Cardiovasculaires & Engagement Communautaire" September 2025

- Developed an AI-based predictive model for assessing 10-year coronary heart disease risk.
- Trained and evaluated classification models using `scikit-learn` on medical datasets.
- Designed data preprocessing pipelines and performed feature engineering to enhance prediction accuracy.
- Presented methodology and results to healthcare professionals and researchers during the congress.

Projects

FinVerse – Gamified Fintech Metaverse Platform [Repo](#)
Built during a fintech hackathon. An interactive platform where users create financial avatars, explore a simulated financial world, receive AI-powered guidance, manage multi-asset portfolios, and encounter cybersecurity challenges.

TuniFia – Personal Finance Management Platform [Repo](#)
A Next.js fintech platform for personal finance management with AI-assisted workflows. Combines money tracking, bill and check management, investment views, and explainable loan readiness insights.

Choufli Hal – AI-Powered Tunisian E-Commerce [Repo](#)
Intelligent e-commerce platform for the Tunisian market featuring semantic search (sentence transformers), visual search (CLIP), AI product comparison (Claude 3.5 Sonnet), budget intelligence, price forecasting, and real-time review analysis.

Medical Chatbot – LLM + RAG Architecture [Repo](#)
An intelligent medical chatbot powered by Llama 3.1 and Retrieval-Augmented Generation (RAG). Answers medical questions by retrieving relevant information from documents stored in a Pinecone vector database.

 Repo

An intelligent todo application powered by LlamaIndex ReAct Agent and Ollama's Llama 3.1. Manages tasks via natural language conversations with persistent storage and priority management.

Technical Skills

Frontend	HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Backend	Node.js, Express.js, NestJS, RESTful APIs, Mongoose, Middleware design
Databases	MongoDB, MySQL, PostgreSQL, Supabase
Data Science	Python, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, feature engineering, EDA
AI / LLM	Hugging Face Transformers, LangChain, LlamaIndex, ChromaDB, Qdrant, RAG systems
Tools	Git/GitHub, Docker, Jupyter Notebook, Google Colab, Postman

Languages

Arabic – Native French – Fluent English – Fluent German – Basic

Certifications

Applications of AI for Predictive Maintenance

NVIDIA Deep Learning Institute

Extracurricular Activities

President – Tunivisions Club, LPBT

- Led the club in organizing tech events and fostering a collaborative learning environment.

Member – Junior Enterprise INSAT (JEI)

- Contributed to organizing FORUM, a major annual event with workshops and a job fair attended by over 1,500 participants.

Soft Skills

- Problem-Solving & Critical Thinking
- Adaptability & Fast Learning
- Teamwork & Collaboration
- Time Management
- Clear Communication
