

Firas Guizani

Computer Engineering Student | AI & Full-Stack Developer

Tunis, Tunisia • +216 21 656 733 • firmas.guizani@insat.ucar.tn

[linkedin.com/in/firas-guizani](https://www.linkedin.com/in/firas-guizani) • github.com/Firasse123

Profile

Computer Engineering student at INSAT with hands-on experience in full-stack development, applied AI, and data science. Proven ability to ship end-to-end solutions — from RAG-powered chatbots and LLM-integrated platforms to predictive medical models — through internships and competitive hackathons. Comfortable working across the stack: React/Next.js frontends, Node.js/NestJS backends, and Python-based ML pipelines. Eager to contribute to teams building impactful, intelligent products.

Education

Bachelor of Computer Engineering

INSAT – Institut National des Sciences Appliquées et de Technologie

2023 – Present (Expected 2028)

Tunis, Tunisia

Baccalauréat (High School Diploma)

Lycée Pilote Bourguiba

Graduated June 2023

Tunis, Tunisia

- Graduated with an average of **18/20** — top of class distinction.

Experience

AI & Web Development Intern

Deevium

Summer 2025

Remote / Tunisia

- Built an AI-powered study notes module (creation, classification, and evaluation) integrated into a production MERN stack application.
- Applied NLP models from Hugging Face Transformers for intelligent content processing and automated tagging.
- Integrated LLMs to deliver personalized learning recommendations, improving user engagement with study materials.

Congress Project – "Prévention des Risques Cardiovasculaires & Engagement Communautaire" September 2025

- Developed an AI-based predictive model for 10-year coronary heart disease risk assessment using **scikit-learn**.
- Designed end-to-end data preprocessing and feature engineering pipelines on medical datasets to maximize model accuracy.
- Presented methodology and results to an audience of healthcare professionals and researchers at the congress.

Projects

FinVerse – Gamified Fintech Metaverse Platform | github.com →

Hackathon project. Users create financial avatars, explore a simulated financial world, receive AI-powered guidance, manage multi-asset portfolios, and face embedded cybersecurity challenges. Built with React, Node.js, and LLM integrations.

TuniFia – Personal Finance Management Platform | github.com →

Next.js fintech platform with AI-assisted workflows for money tracking, bill and check management, investment dashboards, and explainable loan readiness scoring.

Choufli Hal – AI-Powered Tunisian E-Commerce | github.com →

Intelligent e-commerce platform featuring semantic search (sentence-transformers), visual search (CLIP), AI product comparison (Claude 3.5 Sonnet), budget intelligence, price forecasting, and real-time review analysis.

Medical Chatbot – LLM + RAG Architecture | github.com →

Medical Q&A chatbot powered by Llama 3.1 and Retrieval-Augmented Generation (RAG). Retrieves relevant context from documents stored in a Pinecone vector database to generate accurate, grounded responses.

AI Todo Manager Agent | github.com →

Natural-language task manager built with LlamaIndex ReAct Agent and Ollama's Llama 3.1. Supports persistent storage, priority management, and full conversational task control.

Technical Skills

Frontend	HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Backend	Node.js, Express.js, NestJS, RESTful APIs, Mongoose
Databases	MongoDB, MySQL, PostgreSQL, Supabase, Pinecone (vector)
Data Science	Python, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow
AI / LLM	Hugging Face Transformers, LangChain, LlamaIndex
RAG systems	ChromaDB, Qdrant
Tools	Git/GitHub, Docker, Jupyter Notebook, Google Colab, Postman

Certifications

Applications of AI for Predictive Maintenance

NVIDIA Deep Learning Institute

Extracurricular Activities

President – Tunivisions Club, LPBT

2022 – 2023

- Directed club operations, organized tech events, and built a collaborative learning community among students.

Member – Junior Enterprise INSAT (JEI)

2023 – Present

- Contributed to organizing **FORUM**, an annual flagship event with workshops and a job fair attended by over 1,500 participants.
